

DREAM TOMORROW TODAY

Touring Exhibition Premiering 2024

I can impact our future with STEM!

In Dream Tomorrow Today, children positively impact the future, build STEM Identities, and become empowered agents of change!

Using play, visitors create profiles and use their STEM skills to solve future challenges. The exhibition is entirely future-focused and gamified. Interactive, hands-on activities show visitors how to improve their Planet Power scores - ensuring their health, happiness, nature, and equality scores stay high. Personalized STEM identities are awarded to visitors after their hard work (and fun!) to reinforce the skills to create a better future for us all.

Dream Tomorrow Today was developed through extensive Community Conversations with families and local and national STEM and futurism partners. Paying special attention to the exhibition materials, The DoSeum aligned their use with the exhibition's mission - creating a better future for us all. The bulk of production uses organic materials and technology-driven solutions.

Dream Tomorrow Today was developed, designed, prototyped and engineered by **The DoSeum**, and toured internationally by Flying Fish.
